Rope Customer Guide

Crafted from woven polypropylene, rope is ideal for outdoor use. This material has a soft surface that provides good support and excellent sitting comfort.

Care & Maintenance:

Do not pull hard on rope, as it can be stretched out of shape.

As this piece is used outdoors for extended periods, regular cleaning with a soft brush and soapy water is important. This ensures the routine removal of surface soil and debris, such as leaves, berries, pollen and bird droppings, before a steady build-up becomes more difficult to remove.

Stubborn stains can be carefully washed with a high-pressure cleaner on a moderate setting.
